The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/536,743

Applicant(s)

HALL JR. ET AL.

Examiner

William C. Dowling

Art Unit

2851

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 November 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3, 5-18, 20-22 and 24-26 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 20-22 and 24-26 is/are allowed.
- 6) ☒ Claim(s) 1-3 and 5-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☐ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- ☐ Notice of Informal Patent Application
- ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2, 6, 11-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Sayag (7,002,533).

Sayag (7,002,533) discloses a projection system comprising:

A first imager (330) to modulate light;

A second imager (325) of a different size to further modulate the light.

As noted in Column 6 Lines 12-19, the use of 2 modulators provides cumulative gray scale modulation of the image. Column 5 Lines 3-4 disclose that the pixels of the two imagers are similar.

Sayag further teaches the use of a reflective modulator for the first imager, such as a DMD or LCos type. (Column 5 Lines 61-64)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 5-6, 8-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO01/69941 in view of Sayag .

Claims 1-3, 5-6, 8-18

WO 01/69941 discloses a projection device comprising:

a first imager (16A) to modulate light;

a relay lens system (18A);

a second imager (20A) to further modulate the light.

WO 01/69941 teaches the use of digital imagers receiving pulse modulation in the form of DMD's. WO 01/69941 does not teach the use of LCOS systems as the modulators.

Sayag teaches the use of modulators of different sizes to provide a cumulative grey scale modulation of an image. Sayag further teaches the use of a reflective modulator for the first imager, such as a DMD or LCos type. (Column 5 Lines 61-64)

Lacking any criticality to the functioning of the invention it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the device of WO 01/69941 by the substitution of a different type of reflective modulator, such as an LCOS as taught by Sayag, because both types would enable grayscale modulation. It further would have been obvious to one skilled in the art to utilize different sized modulators because Sayag teaches that a cumulative gray scale effect may still be adequately realized with modulators of different sizes. The use of differently sized modulators would allow for different levels of leakage.

1. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over WO 01/69941 and Sayag and further in view of Hansen et al. (6,234,634).

WO 01/69941 and Sayag disclose the invention substantially as claimed but does not teach the provision of a polarizing beam splitter in the light path.

Hansen et al. discloses the use of a PBS adjacent reflective light valves, such as LCOS's.

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the combination of WO 01/69941 and Sayag by the addition of a PBS when using polarization based reflective light valves in order to change the light path of the modulated light from the incident light.

Allowable Subject Matter

2. Claims 20-22, 24-26 are allowed.

Response to Arguments

Applicant's asserts that the reference to Sayag discloses an electronic image display whereas the instant invention deals with a projection system. The devices shown in Sayag are projection systems in that light is projected from a light source through multiple optical elements for viewing by an observer and is not a flat simple display.

Applicant further asserts that Sayag does not form a single image from the two displays but rather superimposes two separate images. It is noted that a superimposition of first image array data and second image array data results in a single composite image. The purpose of the device of Sayag, like that of the instant invention is to form an image with greater contrast than previous systems. This is clearly pointed out in Column 6 Lines 12-24 where the increase in contrast is formed by combined grey scale modulation of the two displays to form a single high contrast

image. Column 5 Lines 5-9 clearly assert the pixel by pixel correspondence of the two displays.

Applicant asserts that the additional reference to Gibbons et al. does not show two modulators differing in size. This is true but this reference is not purported to show such since such limitations were already taught by the primary reference to Sayag. Applicant then further asserts that Hansen et al. does not show what has already been taught by the references to Sayag and Gibbons rather than refute what Hansen is purported to teach. This is an misplaced assertion since it is not necessary for every single reference to show all elements of a claim in a 103 rejection. If a single reference taught all limitations it would be anticipated by a single reference.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
